

Timberline, Oak Creek, Copperfield Court, and Coulee's Crossing Neighborhood

October 14, 2010 Public Informational Meeting

General Project Response:

- ☐ Yes ☐ No 1. Would you support a plan similar to "Option A/A1" that provides additional permanent protection with minimal trees and channel disturbance? (Note that this plan would still require some emergency flood protection measures to be installed.)
- ☐ Yes ☐ No 2. Do you think the city should continue to develop a "Comprehensive" stability and flood risk management plan that may result in removal of nearly all existing trees from the Drain 27 corridor and potential property buyouts?
- ☐ Yes ☐ No 3. To help us further develop and refine the alternatives considered:
- ☐ Yes ☐ No a. Would you support buyouts in your neighborhood if appropriate protection cannot be developed for some properties?
- ☐ Yes ☐ No b. If some homeowners do not wish participate in the project, would you support an option that would provide less protection than Option A/A1?
- ☐ Yes ☐ No c. If there is not adequate support for continuing with a plan to provide added flood risk management, should the city continue to pursue a project with the sole purpose of providing enhanced slope stability?
